

LEAD vs FLIP

Snappy Services · Pin in van · v1 · 5/6/26

SNAPPY SERVICES

HVAC · Marietta, GA

LEAD

= info captured

Customer not ready today.
Tech captures full info for
follow-up by Brayden later.

Required: name, phone,
address, issue, system age.

FLIP

= appointment booked

Brayden actively dispatched
while tech is still on-site
or same-day.

Tech holds the customer
until Brayden ETA confirmed.

5-STEP QUALIFYING SCRIPT

If 4 of 5 hit → FLIP it. Slack Brayden before leaving.

- 1 Note system age + condition
- 2 Ask: "how long planning to stay in home?"
- 3 Comfort or utility-bill pain question
- 4 Budget signal: "if we could solve this today..."
- 5 Confirm decision-maker is present

FLIP HANDOFF — DO ALL 4

1. Slack #installs: tag @Brayden + customer + address + system age + 1-line problem + your rec
2. ServiceTitan: create estimate, attach photos, Lead Source = "Tech Generated", self-sourced
3. Hold the customer on-site until Brayden's ETA is confirmed in Slack
4. Stay warm — keep the customer engaged; don't pack up until Brayden arrives or commits to time
