

FACILITATOR RUN OF SHOW.

Single session | 60–90 minutes | 7 blocks

FACILITATOR

DATE

LOCATION

ATTENDEES

75-MINUTE AGENDA

Time-boxed for one session

- 1** Hook + Why DISC matters
Open with the cost of a missed read. 5 min
- 2** The Four Styles — Deep dive
Walk the framed chart. One quadrant at a time. 15 min
- 3** Self-Assessment + Score
Workbook P3–P4. Tally and reveal. 10 min
- 4** Read the Customer — Drills
Four customer descriptions. Class calls the style. 15 min
- 5** Adapt the Pitch — One script per style
Workbook P6. Read close lines aloud. 15 min
- 6** Role-Play — \$15k System Replacement
Workbook P7. Two rounds, paired techs. 10 min
- 7** Wrap + Commitment + Field Log
Workbook P8. Each tech signs commitment. 5 min

BLOCK 1 — HOOK (5 min)

0:00 – 0:05

SAY THIS

Who here has used a personality framework before? Walk me through what you remember — what stuck, what didn't. Today we're going to learn one that translates straight to the sales seat.

WATCH FOR

Listen for techs naming any DISC-adjacent system — different programs, color codes, animal types, Myers-Briggs. Use whatever they bring up as the on-ramp to the DISC indicators.

BLOCK 2 — THE FOUR STYLES (15 min)

0:05 – 0:20

□ DRIVER

Extroverted + task. Fast pace. Looks for RESULTS. Emotion: ANGER.

Forward-lean, big gestures. Direct, blunt, low patience. 'Get to the point.'

| INFLUENCER

Extroverted + people. Fast pace. Looks for THE EXPERIENCE. Emotion: OPTIMISM.

Hands talking, animated face, weaves. Tells stories. Wants to like you.

S STABLE

Introverted + people. Slow pace. Looks for SECURITY. Emotion: PATIENCE / non-emotional.

Leans back, poker face, steady pace. Polite even when uncomfortable. Loyalty matters.

□ COMPLIANT

Introverted + task. Slow pace. Looks for INFORMATION. Emotion: FEAR.

Arms folded, hand on chin, straight-line walker. Asks lots of questions. Buys on logic.

FACILITATOR TIP

After each style, demo it. Stand up. Walk the pace, copy the body language, deliver one sentence as that style. Techs remember the demo, not the description.

BLOCK 3 — SELF-ASSESSMENT (10 min)

0:20 – 0:30

SAY THIS

Open the workbook to pages 3–4. Sixteen questions. Pick the answer most like you — not the one you wish was you. Be honest. You have 90 seconds for each page. Then we tally.

WATCH FOR

Techs who second-guess themselves. Tell them: there's no wrong answer, only a useful one. After scoring, ask each tech to read their primary aloud. Capture on a whiteboard — you'll use this team map for the role-play pairing.

BLOCK 4 — READ THE CUSTOMER (Drills + Answer Key) (15 min)

0:30 – 0:45

RUN THE DRILL

Read each scenario aloud. Techs call out D / I / S / C as a group. Then reveal. Each tech explains the ONE tell that gave it away.

Scenario 1

She answers the door in workout clothes, no small talk, asks 'how long will this take?' before you sit down. Tapping her keys against her palm.

Why: Pace fast, task-focused, no warm-up, body urgent.

Scenario 2

He's mid-story about his cousin's HVAC nightmare before you're through the door. Offers you coffee. Asks where you grew up.

Why: Talks first, people-focused, story-driven, wants to connect.

Scenario 3

Quiet. Polite. Offers a chair. Says 'no rush, take your time.' Glances at her husband before agreeing to anything.

Why: Slow pace, people-focused, defers, wants harmony / consensus.

Scenario 4

Arms crossed. Has a printout of three competitor quotes on the table. Asks for the SEER2 rating before you've sat down.

Why: Arms folded, task-focused, data first, wants precision.

BLOCK 5 — ADAPT THE PITCH (15 min)

0:45 – 1:00

SAY THIS

Workbook page 6. Each style gets a script. Read the close line aloud — in their voice, their pace, their body. Then I want each of you to flag your hardest customer style and commit to one flex this week.

THE OPPOSITES (where techs struggle most)

If your primary is D (Driver)

Your hardest customer is S (Stable)

Slow down. Stop closing on the first visit. Let silence sit.

If your primary is I (Influencer)

Your hardest customer is C (Compliant)

Cut the story. Lead with data. Bring the spec sheet.

If your primary is S (Stable)

Your hardest customer is D (Driver)

Skip warm-up. Give the bottom line in 30 sec or less.

If your primary is C (Compliant)

Your hardest customer is I (Influencer)

Drop the detail. Tell a story. Sell the feeling, not the spec.

BLOCK 6 — ROLE-PLAY: \$15k SYSTEM REPLACEMENT (10 min)

1:00 – 1:10

SETUP

Workbook page 7. Pair techs. Round 1: deliver pitch to a D customer (4 min) + feedback (1 min). Round 2: switch roles, deliver pitch to an S customer (4 min) + feedback (1 min). You play the customer for each pair — exaggerate the style so techs see the contrast.

DEBRIEF QUESTIONS

1. Which round felt harder, and why? 2. What did you have to STOP doing to land it? 3. What's the smallest tell you saw that you would have missed last week?

BLOCK 7 — WRAP + COMMITMENT (5 min)

1:10 – 1:15

SAY THIS

Workbook page 8. Sign your commitment. This week you'll log 5 reads — call the style BEFORE you start the pitch, then note how you adapted and what happened. At our next 1-on-1 we'll review your best read and your worst miss. The reads get sharper every week — after a month, it's automatic.

COMMON PUSHBACK — HANDLE IT BEFORE IT SPREADS

"This feels like pigeonholing people."

Agree first. Then reframe: DISC isn't a cage, it's a starting language. Everyone is a blend — primary + secondary + situation. We're not labeling humans, we're picking the lens that gets us in their world faster. Every great salesperson does this. We're just naming it.

"I already read people. This is common sense."

Probably true — but common sense is inconsistent. The framework gives you a checklist so you don't drop a read when you're tired or distracted. Pros run plays. This is your play.

"What if the customer is a mix?"

Most are. Sell to the PRIMARY behavior first 90 seconds. If the secondary shows up (Driver asking detail questions = D/C blend), flex to add data. The matrix on workbook page 5 shows the tells — read body and pace, those don't lie.

"This is just sales psychology hype."

DISC came from a 1928 academic — Marston (yes, the Wonder Woman guy). It's older than every sales seminar. We use it because it shortens the curve on new customers. You don't have to believe in it — try it on five customers and tell me your close rate.

WHY THIS LAYER MATTERS

Goes deeper than style

FRAME IT

DISC tells you HOW they buy (pace, body, communication). Spranger tells you WHY they buy (what they value). When you know both, the close line writes itself — you speak to the value, in their style.

AESTHETIC

Beauty / harmony

Sees the world as form and feel. Buys for how it looks and feels in the home. Sell quiet, clean, premium finish.

ECONOMIC

Practical / useful

Time = money. Buys ROI. Sell payback, energy savings, warranty math.

INDIVIDUALISTIC

Power / personal advantage

Buys what raises their standing. Sell status, premium tier, 'best in your neighborhood'.

POLITICAL

Power / status / influence

Wants control. Buys to lead the room. Sell decisiveness, top-tier, executive option.

ALTRUISTIC

Service to others

Buys for the family / dependents. Sell safety, reliability, peace of mind for the people they love.

REGULATORY

Order / system / rules

Buys what's compliant, standard, the right way. Sell certifications, code, manufacturer specs.

THEORETICAL

Truth / knowledge

Buys the best-engineered option. Sell efficiency ratings, engineering, the 'why' behind every choice.

HOW TO USE IT

After the role-play, ask each tech: what's your primary VALUE? Then watch how it lines up with style. A D + Economic sells very different from a D + Aesthetic. Save this for techs who want to go deeper.

MARSTON MOTIVATORS — THE 4-P FRAME

The original DISC source

PROBLEMS

Driven by results

Style: D (Driver)

Emotion: Anger

PEOPLE

Driven by interaction

Style: I (Influencer)

Emotion: Optimism

PACE

Driven by stability

Style: S (Stable)

Emotion: Patience

PROCEDURES

Driven by accuracy

Style: C (Compliant)

Emotion: Fear

HANDLING CHANGE — ADOPTION CURVE

Who buys new tech first

Innovators

2.5%

DISC: D

First to try anything. Buy on novelty. 'New = good.'

Early Adopters

13.5%

DISC: D & I

Want the edge. Buy on vision. Pitch the future.

Early Majority

34%

DISC: I & S

Wait for proof from peers. Pitch references.

Late Majority

34%

DISC: S & C

Skeptical. Need data + social proof. Pitch security.

Non-Adopters

16%

DISC: C

Resist until forced. Pitch compliance / consequence.

FOLDING DISC INTO THE SNAPPY MATRIX

For Mark

PROPOSED COLUMNS

Add three matrix fields next sprint: (1) DISC_SELF — primary letter from the self-assessment, (2) DISC_READ_ACCURACY — partner-graded 1–5 weekly average, (3) DISC_FLEX_SCORE — count of role-play criteria passed. These become the new Adapt-the-Pitch coaching lane.

WEEKLY CADENCE (post-training)

Monday	Tech reviews their own DISC card before first call of the week.
Daily	Log every customer read in the field log (workbook P8).
Friday	1-on-1 review: best read, worst miss, one flex commitment for next week.
Monthly	Pair role-play during team huddle — opposite-style customers only.
Quarterly	Retake the 16-Q self-assessment. Track if primary/secondary has shifted.

SOURCE MATERIAL

- Framed Scripting & Roleplaying chart (in-office reference)
- Marston, W.M. — Emotions of Normal People (1928)
- Spranger, E. — Types of Men (1928, translated 1928)
- Results Group DISC wheel (© 2012)
- Rogers, E.M. — Diffusion of Innovations (adoption curve)

FACILITATOR SIGN-OFF

Session completed. All techs scored, signed commitment, paired for next 1-on-1.
