30-SECOND READ — DECISION TREE

1. Pace check: Are they FAST or SLOW?
2. Focus check: Are they TASK-focused (results, data) or PEOPLE-focused (stories, feelings)?

Fast + Task = D Fast + People = I Slow + People = S Slow + Task = C

When you're not sure — watch what they DO, not what they say. Body and pace don't lie.

YOUR FLEX

Your primary style is your default. The hardest customer is the OPPOSITE style (D ↔ S, I ↔ C).

My primary is ____ . My hardest customer style is ____ . This week I will deliberately flex by:

SCENARIO

10-yr-old 4-ton split system. R-22, declining performance. Homeowner is on the call.

You're presenting a \$15k full system replacement — 3 options: good / better / best.

You'll deliver the pitch twice — once to a D-style customer, once to an S-style customer.

ROUND 1 Customer style = D (Driver) | 4 min pitch + 1 min feedback

Tech delivering: _____

Partner / grader: _____

GRADING — partner checks each box that passed:

- ☐ Did they get to the point fast? (no small-talk warm-up over 30 sec)
- ☐ Did they present 3 options clearly with the bottom line first?
- ☐ Did they avoid hedging language? ('um', 'maybe', 'I think we could')
- ☐ Did they ask for the decision? (close the loop, don't trail off)
- ☐ Did they MATCH the customer's pace and energy?

PARTNER NOTES:

ROUND 2 Customer style = S (Stable) | 4 min pitch + 1 min feedback

Tech delivering: _____

Partner / grader: _____

GRADING — partner checks each box that passed:

- ☐ Did they slow down their pace to match the customer?
- ☐ Did they show sincere interest in the family/home?
- ☐ Did they NOT pressure or create false urgency?
- ☐ Did they offer proof / references / take-the-time reassurance?
- ☐ Did they invite questions and listen more than they talked?

PARTNER NOTES:

MY COMMITMENT

This week, I will consciously read the DISC style of EVERY customer before I start my pitch.
I'll log my best read and my worst miss below — and we'll review at the next 1-on-1.

Tech signature: _____ Date: _____

FIELD LOG — THE WEEK AHEAD
